- 1 x Hand Pump
- 3 x Interchangeable Wound Profile Blocks
- 2 x Bullet Wound Profiles
- 1 x Stab Wound Profiles
- 1 x User Guide

ADVANCED TCCC TRAINING AID

The Tourniquet and Wound Packing Trainer fills critical gaps in training resources by accurately replicating blood flow through various wound types, providing visual feedback in real time. Train your team to stop any type of wound from bleeding with effective tourniquet application and wound-packing techniques.

This advanced TCCC training aid ensures that teams can develop and hone critical life-saving skills with precision and confidence.

The Trainer comes complete with a “training arm” that features active bleeding and provides variable training through realistic wound profiles with interchangeable wound blocks. The Trainer comes equipped with three wound blocks: two bullet wounds and one stab wound. In total, there are seven wound blocks available for purchase. The Trainer also includes a hand pump for blood flow simulation and a comprehensive user guide.

DIMENSIONS

- L 30” x W 6” x D 6”
- 8 lb 8 oz
- Block: 1.75” x 1.75” x 1.65
